**Abstract not available for EP1694829 (B1)**

**Abstract of corresponding document: WO2005056781 (A1)**

The invention relates to the use of proteins and peptides coded by the genome of the isolated or purified strain of severe acute respiratory syndrome (SARS)-associated coronavirus, resulting from sample reference number 031589 and, in particular, to the

use of protein S and the derivative antibodies thereof as diagnostic reagents and as a vaccine.
